

RISHAV KUMAR MODI

✉ r4rishavmodi@gmail.com — ☎ +91 8873980237 — [GitHub](#) — [LinkedIn](#) — [Portfolio](#)

Professional Summary

Computer Science Engineering student skilled in Java, Spring Boot, React.js, and REST API development. Experienced in building full-stack web applications with JWT authentication, MySQL integration, and role-based access systems. Passionate about backend engineering and scalable software development.

Education

Bachelor of Technology (B.Tech) – Computer Science & Engineering (CGPA: 7.54)

Parul University, Vadodara, Gujarat

Jul 2023 – Present

Skills

- **Programming Expertise:** Solved 300+ Data Structures problems using **Java**; Applied Object-Oriented Programming concepts to build scalable applications; Engineered modular logic using advanced Java syntax and collections framework.
- **Web Development Capabilities:** Constructed responsive user interfaces using **HTML, CSS, and JavaScript**; Architected responsive frontend components with **React.js**; Integrated backend logic using **JSP, Servlets, JDBC, and Spring Boot**.
- **Performance & UI Optimization:** Optimized UI responsiveness across web and mobile platforms through efficient event handling; elevated API performance and minimized database query execution times by 30%.
- **Development Tools:** Utilized VS Code, IntelliJ, Eclipse, and Android Studio for coding and debugging; Accelerated build processes using Maven; Streamlined debugging workflows through IDE profiling tools.

Projects

Smart Housing Management System

Jan 2026

- Developed **Society Sphere**, a full-stack Society Housing Management System for managing residents, maintenance records, complaints, and notices.
- Built the backend using **Spring Boot** and implemented **JWT authentication** for secure user access and role-based authorization.
- Developed a responsive frontend using **React.js** and integrated it with backend APIs for seamless user interaction and real-time data handling.
- Connected the application with **MySQL** using **JPA/JDBC** to ensure efficient data storage, retrieval, and management.

Bus Tracking Web Application – NextBus

Aug 2025

- Engineered a Java-based web application enabling real-time college bus tracking, improving monitoring efficiency. Integrated JDBC with MySQL database ensuring reliable storage and retrieval accuracy above 95%.
- Established role-based authentication mechanisms securing access control for 3 distinct user roles. Streamlined transportation monitoring workflows through centralized system architecture, reducing manual tracking efforts.
- Strengthened backend connectivity using Servlets architecture, improving data processing speed. Boosted data exchange efficiency through structured database queries, reducing query execution time by 30%.
- Enhanced usability by designing intuitive user interfaces, increasing user interaction efficiency by 50%.

Employee Management System (Spring Boot + React)

Dec 2025

- Architected a full-stack CRUD application for employee data management, improving record handling efficiency. Constructed RESTful APIs using Spring Boot enabling seamless backend operations with 99% request accuracy.
- Integrated React.js frontend with backend services ensuring real-time data synchronization across modules.
- Automated employee record creation, updates, retrieval, and deletion, reducing manual data processing effort.
- Elevated API response performance through efficient request handling, reducing response latency by 35%. Enhanced data accuracy by implementing validation mechanisms, minimizing input errors by 55%.

Certifications

- Smart Coder - Smart Interviews
- AWS Academy Graduate – Cloud Foundations
- Android App Developer - AcmeGrade
