

Python Programming Notes

Introduction

Python is a high-level, interpreted, object-oriented programming language.

Variables and Data Types

Common data types: int, float, str, bool, list, tuple, set, dict.

Control Statements

if, elif, else, for loop, while loop, break, continue, pass.

Functions

Functions are defined using the def keyword. Lambda functions provide anonymous functions.

Object-Oriented Programming

Concepts include Class, Object, Inheritance, Polymorphism, Encapsulation, and Abstraction.

Exception Handling

Uses try, except, else, finally, and raise.

Interview Questions

1. What is Python?
2. Difference between List and Tuple?
3. What is Inheritance?
4. What is a Dictionary?
